PINS - CONCRETE & STEEL

Trak-Pro Concrete Battery Nailer is designed to be used along with Allfasteners Trak-Pro GNH Concrete Nails. **Trak-Pro GNH Concrete Nails** are made out of high carbon steel - and galvanized coated for corrosion resistance - ensuring strength and hardness, for use in attaching light-gauge steel to concrete. Industry standard collated nails are .109" diameter. Various lengths available.

Allfasteners also offers **Trak-Pro GNS Steel Nails** with a step shank, for use in heavy-gauge steel. Designed to attach light-gauge steel to heavy-gauge steel. Industry standard collated steel nails are .109" diameter and available in 1/2" lengths.

Trak-Pro Concrete Battery Nailer can also be used with other industry standard .109" collated nails if required.
