SLIP-ON LOCK NUTS & W/ SQUARE WASHER

ZINC

Slip-On Lock Nuts are specialized fasteners featuring two nuts stacked end-to-end. These can be slipped directly onto a threaded rod at any point, eliminating the need to spin them down the entire length. This innovative design enables quick assembly, reduces labor time, performs well in confined spaces, and provides vibration resistance.

Slip-On Lock Nuts with Square Washers are specialized fasteners featuring a nut and washer stacked end-to-end. These can be slipped directly on a threaded rod at any point, eliminating the need to spin them down the entire length. The integrated locking design enables fast installation and resists vibration, while the square washer distributes load evenly and prevents pull-through in oversized holes.
