

15W LED Clamplight 1700

Base clamp stand –
35mm (1-3/8") capacity

Li-ion

GENERAL USE:

The Clamplight is powered by a non-removable 7.4V / 4400mAh lithium-ion rechargeable battery. Correct maintenance is essential to ensure maximum battery life and performance.

Although the unit is supplied with some charge it is advisable that a full charge is completed prior to initial use.

Charging unit between use is recommended, if left for up to 3 months without use a full charge is advisable.

CHARGING:

1. Switch the light off whilst charging. The battery will not charge while the light is on.
2. Only use the supplied power adaptor to charge the unit. Connect the power adaptor to the appropriate mains power source.
3. Full charge time is approximately 4.5 hours.
