

SAFING MINERAL WOOL

2" X 24" X 48"

Safing Mineral Wool is made of basalt volcanic rock fibers with thermosetting resin binder. Advanced production ensures reliable quality, high fiber density & low shot content for high temperature heat control & fire resisting use.

KEY FEATURES

- Thermal insulation gives control over heat loss for lower operating costs
- Easy to handle, fabricate & cut with a knife; clean handling reduces irritation and minimizes clean-up & expense
- Does not support fungi/mold

PERFORMANCE INFORMATION

Tested in accordance with ASTM E84 (UL 723), CAN/ULC-S102-M (flame spread rating of 5 and smoke developed rating of 0; faced insulation has flame spread rating of 25 and smoke developed rating of 5); noncombustible in accordance with ASTM E136 and CAN4-S114-M
